Creative Strategist | Paid & Creator Growth

Performance creative strategist with three years at HoYoverse (Genshin Impact, Zenless Zone Zero), turning campaign data into creative decisions and creator content into a growth channel across Japan, North America and Europe.

EXPERIENCE

HoYoverse Shanghai, China

Marketing Specialist, Global Marketing (Genshin Impact brand team) Sep 2023 – Aug 2026

- Grew brand-team creative from 0% to 15% of paid spend at ~3.7× projected LTV vs benchmark by building a creator ad pipeline for user acquisition (UA) from scratch: owned the creative testing roadmap across hooks, angles and formats, and directed 400+ creator videos for Japan, North America and Europe.
- Cut creative analysis and production time by 40% by building an AI-powered Creative Intelligence Dashboard (built with Claude Code) that tags every ad, translates performance data into creative insights and codifies winning patterns into scripts and playbooks.
- Built Zenless Zone Zero's new Japanese social channels into a nine-channel network with 80M+ organic views and 50%+ lower agency CPM by testing positioning and formats against KPIs, scaling what worked, cutting what didn't and documenting the playbooks for handover.
- Reached 80M+ views and ~60% lower CPM by Round 3 by designing a three-round TikTok UGC incentive test, then moved the budget to creator ads based on CPI and user quality against UA benchmarks, not just reach.
- Drove +338% CTR and 66% lower CPC vs benchmark for Genshin Impact's Xbox launch by building four testable creative concepts, localising them for the US, France and Germany, and backing the winners with the media strategist.
- Drew ~7× the benchmark visitors to a launch landing page, with 3× the benchmark conversion rate, by designing a personality-quiz hook and a referral-based viral loop that brought in ~4 new visitors per share.
- Achieved ~3× engagement and 39% lower CPM vs benchmark on an X creator campaign by owning the creator lifecycle and rebuilding the 56-creator lineup around the creators that core players follow.
- Contributed to 600M+ views and 600K+ user videos for Genshin Impact's Lunar New Year AR filters on TikTok and Snapchat by co-developing the filter concepts and briefing 70+ creators to seed the trend.

AI Content Channel, Xiaohongshu & Douyin Remote

Creator (own project) 2025 – Present

- Took a personal channel for AI beginners from zero to 2M+ views, 170K+ likes and 16K+ followers, and won paid partnerships with China's leading AI companies (Alibaba's Qwen, ByteDance's Jimeng, MiniMax, Moonshot AI's Kimi), by testing formats and topics against saves and follows.
- Ran the whole channel single-handed by building Creator OS, an AI system for research, scripting and performance reviews.

Nike Shanghai, China

Social Media Marketing Intern Dec 2021 – Aug 2022

- Added 1.33M+ #NikeOOTD hashtag views month on month for Nike Women launches on Xiaohongshu by developing the hashtag and optimising the influencer and UGC programmes.

EDUCATION

The University of Chicago, *MA in Humanities (Cinema & Game Studies)* Chicago, IL | 2022 – 2023

Xi'an Jiaotong-Liverpool University, *BA in Communication Studies* Suzhou, China | 2017 – 2021

GPA 3.9/4.0, ranked 1st of 70; China National Scholarship. Editor-in-chief of the X Mirror student magazine.
